

## National Conference on Scholarly Communication and Scientometrics

27 & 28 September 2019

1<sup>st</sup> Announcement

The advancement of ICT has redefined the dynamics of information and its formats in science communication. The process of scholarly communication by researchers and academicians is effective more than ever before and its reach is much faster through online and social media. The transition of information formats and transmission through online channels, the reach of science for wider academicians and beyond have enhanced the research impact to the next level. Simultaneously, it has also opened the plethora of opportunities to the metrics community to compute the impact with much wider indicators. The two days national conference will have plenary talks, presentations, brain storming sessions, deliberations, panel discussions by eminent speakers from across the disciplines of scholarly community and the domain of metrics. Full papers and abstracts are invited for the conference, but, not limited to the following subthemes

- Scholarly Communication and Impact Analysis
- Open Access and Scholarly Publishing Models
- eLearning, MOOCs and Digital Repositories
- Scientometrics 2.0
- New Metrics & Scholarly Impact
- Future of Communication and Metric Tools
- Librarianship and Research Impact Analysis
- Research Evaluation Tools
- Bibliometric Laws
- Big Data & Social Networks
- Digital Libraries and Open Access
